AWARDED TO

Moses Okumu

for completing

Python Basics & Beyond: Intro to Data Analysis with Python

Competencies:

Python Basics and Beyond is a 12-week online course in data analysis delivered by the GRAPH Network and the IDMM group of the University of Geneva. Graduates have demonstrated proficiency in Python programming, data manipulation with Pandas, data visualization with Plotly, and version control with Git. Through hands-on projects, they have developed skills in data cleaning, analysis, and interactive dashboards. This certificate confirms their ability to apply these tools appropriately.
